

BM5500

Insulation resistance tester

BM5500 is a battery and mains powered insulation tester with digital and analogue arc display, designed for high voltage insulation resistance testing in the maintenance and servicing of cables, rotating plant machinery, transformers, switchgear and industrial applications.

- CATIII 600 V safety rating
- Guard terminal to shunt surface leakage currents
- Five test ranges; 250 V, 500 V, 1000 V, 2500 V and 5000 V
- Selectable DC or AC (including frequency) voltmeter functions
- Insulation (InS), Polarization Index (PI) and variable timed test (t) modes
- 1 T Ω , 1.4 mA, 5 kV digital insulation tester with digital and analogue display
- And more...
